

## Hackathon Judging Criteria

To ensure a comprehensive and fair evaluation of each project, please use the following criteria and assign marks accordingly. Each criterion is critical to assessing the overall quality and potential of the projects.

<b>Criterion</b>	<b>Description</b>	<b>Marks</b>
<b>Understanding and Application of Blockchain Concepts</b>	Evaluate how well the team has grasped the core concepts of blockchain (ICP ecosystem). Assess the correct application of these concepts in their prototype.	20
<b>Functionality</b>	Determine if the prototype meets the intended functionality. Assess the reliability and correctness of the implemented features. (System is not required to be full completed)	25
<b>Innovation and Creativity</b>	Evaluate the uniqueness and originality of the idea. Assess how the prototype stands out in terms of creativity and innovative approach.	20
<b>Technical Implementation</b>	Evaluate how well the prototype demonstrates the use of ICP blockchain technologies, considering the integration and implementation of core features.	20
<b>User Experience and Design</b>	Evaluate the usability and user-friendliness of the prototype. Assess the visual design, layout, and overall user experience.	15

**Total Marks: 100**

### Instructions for Judges

1. **Review each prototype** based on the criteria outlined above.
2. **Allocate marks** for each criterion, ensuring that the total adds up to 100.
3. **Provide feedback** for each project, highlighting strengths and areas for improvement.
4. Submit your scores and feedback to the organizing committee.

Judges, please follow these criteria and use the provided marks to evaluate each project fairly and comprehensively. Thank you for your contribution to this hackathon.
