| ●Communication | ●Social media management |

HOBBIES AND INTERESTS

- My hobbies are watching movies and listening to music. Watching movies introduces me to the outside world and deepens my understanding of the world beyond the definitions of the background. Films about women's roles grow my confidence and encouragement that women can do much better like or even more than men do. I also enjoy listening to music because the message of hope is passed through music, and one manages to relax after a hard day of work and stress.
 - My interests are tied with what grabs my attention toward life career essentials, and these are ; First, Entrepreneurship, which helps me to understand the world naturally so that I can be ready to turn the world's problems into opportunities using the entrepreneurial mindset and leadership skills, Second, Sharing ideas: this interest means a lot to me because while understanding the perspectives and challenging ideas we can get the rights ways to solve our problems and find the lasting solutions for the betterment of our globe, Third, Critical thinking: I love going through conscience before I make decisions, I don't like it to decide based on emotions and situations, but a reasonable and logical conclusion should be based on the facts to avoid mistakes and side effects
